San Antonio, TX | 210-542-6855 | Samueladams412@gmail.com | linkedin.com/in/samadams412 | samuelkadams.com

SUMMARY OF QUALIFICATIONS

Full-Stack Software Engineer with hands-on experience across production client web development, cloud infrastructure, and IT support. Demonstrates strong written and verbal communication skills, developed through technical mentoring and direct client collaboration, and exhibits self-directed problem-solving, initiative, and time management across concurrent coursework, freelance client work, and personal infrastructure projects.

Computer Skills: Microsoft Office Suite, Adobe Creative Cloud (Dreamweaver)

Technical Skills: React, Next.js, Node.js, PHP, Python, PostgreSQL, MySQL, MongoDB, AWS (EC2, S3, Lambda), Proxmox VE, WordPress/WooCommerce, Stripe API, Git/GitHub

EDUCATION

Bachelor of Science in Computer Science, University of Texas at San Antonio	Expected Graduation December 2026
Full Stack Web Development Coding Bootcamp Certificate, University of Texas at San Antonio	2022

EXPERIENCE

Instructional Specialist | EdX Feb. 2022 – Aug. 2024

- Instructed and mentored 50+ students across 20+ full-stack web development curriculum units, teaching HTML, CSS, JavaScript, React, Node.js, MySQL, MongoDB, GraphQL, and Stripe API integration
- Diagnosed and resolved student coding, environment, and configuration issues in real time, translating technical concepts clearly for learners at different skill levels
- Maintained and updated course systems using GitLab, GitHub, and version-control best practices

Freelance Web Developer | Self-Employed 2024 - Present

- Design, build, and maintain a live production e-commerce site (Rave Wavelengths) using WordPress CMS, custom PHP development, and the WooCommerce plugin for product and order management
- Integrate the Stripe payment gateway for secure transactions and configure additional plugins to extend site functionality
- Independently manage multiple client and personal technical projects end-to-end, balancing deadlines and priorities across coursework and client work simultaneously

RELEVANT PROJECTS

GroceryPortal | Full-Stack E-Commerce Application

- Built a full-stack e-commerce application using Next.js, Prisma ORM, and PostgreSQL, with Stripe API payment integration for secure checkout

AWS EC2 MicroCMS + Auth System | Web Technologies Course

- Provisioned an AWS EC2 instance under a dedicated IAM user (least privilege) and configured nginx with a self-signed HTTPS/TLS certificate
- Built a MySQL-backed CMS from scratch with dynamic PHP routing and a full authentication flow using salted SHA-256 password hashing and server-side session management

Fox Lab | Home Infrastructure Lab

- Architected and administered a hyperconverged home lab on bare-metal Proxmox VE — 3 LXC containers and 1 KVM VM spanning DNS filtering (Pi-hole), Dockerized game server hosting, GPU-passthrough media streaming, and an isolated Linux development environment
- Applied SRE practices: live CPU/RAM reallocation across workloads, qemu-guest-agent ACPI integration for clean shutdowns, and a zero-trust outbound tunnel for external access without exposing inbound router ports
